

Media buying is a commodity. Creative is the variable.

Performance marketing and creative strategy across Meta, Google, TikTok and LinkedIn, with the measurement and lifecycle work that turns a click into revenue.

A full-stack approach to performance

Over the years I've worked with brands across **e-commerce, real estate, higher education, SaaS and service businesses**, from single-founder stores to full media productions for Fortune 500 clients.

I scale brands through a full-stack performance approach. I don't just manage ad spend; I engineer the entire conversion journey, from the creative that earns attention to the CRM stage where a lead becomes revenue.

|

Media buying is a commodity. Creative is the variable of success.

So I use data to inform creative strategy, and creative to drive down acquisition costs. Deep technical control of Meta, TikTok and Google Ads, combined with hands-on creative direction, photography and videography, is what turns attention into measurable revenue.

AED81.3M CLOSED DEAL VALUE	5,364 LEADS, ONE ACCOUNT	15.73x PEAK GOOGLE ROAS	+141% EMAIL VALUE, YOY
--	--	---	--

What I help businesses do		5 outcomes
01	Generate sales-qualified leads at a lower cost	
02	Scale e-commerce revenue profitably	
03	Lift conversion rates with data-driven insight	
04	Build high-performing, full-funnel marketing systems	
05	Direct creative, photography and video that stops the scroll	

Four disciplines, one funnel

Creative, media, measurement and retention run as one system, because a cheap click is worthless if the page, the follow-up or the tracking lets it go.

Creative Direction & Strategy

A

Ideas and hooks built on audience pain points and psychological triggers, tested with the same rigour as media.

- Creative strategy** Angles, hooks and messaging frameworks derived from audience research.
- Direct-response design** UGC video scripts, static ad frameworks and motion graphics that convert.
- Modular testing** Hooks, bodies and CTAs tested separately to find winners scientifically.
- Content briefing** Creators and designers managed to produce social-first assets.
- Production** Photography and videography, on set and in the edit.

Paid Media Management

B

Full-funnel buying across the platforms where intent and attention actually live.

- Meta & TikTok** Scaling structures with CBO and ABO, Advantage+ and broad targeting.
- Google Search & PMax** Complex keyword architectures and Performance Max for high-intent demand.
- LinkedIn ABM** Account-based targeting for B2B lead generation.
- Programmatic** Eskimi DSP and Oracle BlueKai beyond the walled gardens.
- Retargeting** Multi-touchpoint sequences that reduce funnel drop-off.

Data, Analytics & Tracking

C

Measurement that survives privacy changes and tells the truth about top-of-funnel spend.

- Measurement protocols** Full setup of GA4, Google Tag Manager and the Meta Conversions API.
- Attribution modelling** Beyond last click, to understand the real impact of awareness spend.
- Reporting** Dashboards that tie spend to leads, revenue and pipeline stage.

Lifecycle & Retention

D

The revenue that happens after the click: email, flows and a CRM that closes the loop.

- Email & flows** Klaviyo campaigns and automated flows for Shopify stores.
- CRM pipeline** Lead status, qualification and follow-up feeding back into targeting.
- Conversion rate** Landing page and offer iteration driven by funnel data.

Selected results, straight from the accounts

From lead to closing

Media buying only matters if the sales team can close what it delivers. The CRM follows the same pipeline end to end: 14,743 contacted leads, 763 qualified, 75 closed, and AED 81.3M in closed deal value. Lead status was fed back into targeting and creative, so campaigns learned from what closed rather than what merely converted.

LOOP	Closed-deal profiles fed back into Meta audiences

Purchase-optimised growth on Meta

Purchase-optimised campaigns for UAE e-commerce brands, mixing Advantage+ shopping with creative-led prospecting and retargeting. Three account views of the same period: the funnel, the efficiency and the return on a 7-day click window.
